Asia Console Vanity

I have looked at the market orientation and recent style trends and what I see is going towards "functional modern".

Elegant in design, clean lines, and a sense of strength "Asia" encompasses all these qualities and more.

Overall 28"w. 22"d. and 34" tall (shown in W.Bze)

The sink is carved out of a solid piece of stone 5" thick giving it style and consistency. The metal frame it's mounted on gives it a sturdy and yet simple elegant look.

.Suggested retail \$ 1,995
